

How To Order Die Molding Services

Send your artwork to us "camera ready," meaning that it is in black ink on clean, unlined white paper or posterboard. Since your costs are determined by the total number of square inches submitted, place your designs close together. You only need to leave enough room between designs to cut them apart. Determine the total to the nearest image size; for example, an image area measuring 7-1/4" x 9-1/2" = 68-7/8 square inches and will be considered as a 70 square inch area.

Now you need to decide how much you want to invest in the "set-up" cost. The set-up consists of the Master Plate (either deep etch or standard etch) and the Matrix Mold. For 70 square inches, your cost Deep Etch Master Plate and Matrix Mold is \$124.25 + \$34.80 = \$159.05 One sheet of rubber dies is \$6.05

You may submit your artwork electronically, too - call for instructions.

Deep Etch

11 point magnesium master plate etched to approximately .070" depth. Customary character height found on most art stamps sold today.
